

BUSINESS REQUIREMENTS DOCUMENT (BRD)

Deepa Handmade – Wire Kudai & Handmade Basket E-Commerce Platform

Document Version: 1.0

Business Type: Handmade Wire Kudai / Wire Basket Manufacturing & Selling

Primary Market: Tamil Nadu, India

Languages: Tamil + English

Currency: INR (₹)

Payment Methods: UPI Manual Verification + Cash on Delivery

Status: Complete Business Requirement Specification

1. Executive Summary

Deepa Handmade is an online platform for selling handmade plastic-wire / handmade wire Kudai, baskets, bags and related handmade products. Customers can browse products, select colors and sizes, place customized and bulk orders, pay through UPI with manual payment-proof verification, or select Cash on Delivery (COD), and track orders.

The admin will manage products, categories, pricing, orders, UPI settings, payment verification, COD orders, customers, inventory, production, shipping, offers and reports.

2. Business Objectives

- Provide an online storefront for Deepa Handmade products.
- Showcase handmade products with images, colors, designs, sizes and pricing.
- Keep payment simple: UPI Manual Verification + COD only.
- Allow customers to upload UPI payment screenshots for manual verification.
- Support custom color, size, quantity and design requests.
- Support wholesale/bulk orders for shops, resellers, functions and businesses.
- Provide an admin system for the complete order lifecycle.

3. Scope

3.1 In Scope

- Customer registration/login, product browsing, search and filters.
- Product details, cart, checkout and order tracking.
- UPI manual payment with QR, UPI ID and screenshot upload.
- Cash on Delivery.
- Custom orders and bulk/wholesale enquiries.
- WhatsApp ordering/contact.
- Admin dashboard, products, categories, orders, payments, customers, inventory, production, shipping and reports.

3.2 Out of Scope

- Credit/debit cards, net banking, PayPal, Razorpay, Stripe, wallets, cryptocurrency, EMI and BNPL.
- Automatic UPI payment verification.

4. User Roles

- Customer – browse, order, pay by UPI/COD, upload payment proof, track orders, request customization and bulk orders.
- Admin – manage the complete business, products, orders, payments, customers, inventory, production, shipping, offers and reports.
- Staff (future) – restricted access for order processing, production, packing, shipping and inventory.

5. Customer Website

Main navigation: Home, Products, Categories, Custom Order, Bulk / Wholesale, About Us, Contact, My Account and Cart.

5.1 Home Page

- Hero section with handmade branding and Shop Now / Custom Order CTAs.
- Featured categories and featured products.
- Why Deepa Handmade: Handmade, Custom Designs, Multiple Colors, Bulk Orders, Direct From Maker, Quality Checked.
- Custom order banner.

5.2 Product Categories

- Wire Kudai: Small, Medium, Large.
- Handmade Bags: Hand Bags, Shopping Bags, Carry Bags.
- Storage Baskets.
- Vegetable Baskets.
- Flower Baskets.
- Pooja Baskets.
- Gift Baskets.
- Custom Products.

6. Product Management

Admin can create and manage products.

- Product Name, SKU, Category, Description, Short Description.
- Price, MRP, Discount, Stock Quantity, Minimum Order Quantity.
- Weight, Length, Width, Height, Material.
- Available Colors, Available Sizes.
- Product Images, Video, Tags, Featured and Active/Inactive status.

7. Product Customization

- Color selection: Red, Green, Blue, Yellow, Pink, Purple, Orange, Multicolor and Custom.
- Size selection: Small, Medium, Large and Custom Size.
- Handle options: Standard, Long and Custom.
- Customer quantity selection.

8. Custom Order

Customers can submit special requirements with product type, required size, preferred color, quantity, required date, budget, additional requirements and a reference image. Admin reviews the request, provides a price quotation, and converts an accepted quotation into an order.

9. Bulk / Wholesale Orders

- Business Name, Contact Person, Mobile, Email, Product, Quantity, Expected Price, Delivery Location, Required Date and Message.
- Optional reference image.
- Admin-configurable quantity-based wholesale pricing.
- Future reseller program with reseller-specific pricing.

10. Cart & Checkout

- Cart shows product, image, color, size, quantity, unit price and subtotal.
- Checkout collects name, mobile, optional email, address, village/town, district, state and pincode.
- Customer can add/select saved delivery addresses.
- Order summary includes subtotal, discount, shipping and grand total.

11. Payment System

Only two payment methods are supported: UPI Manual Verification and Cash on Delivery. No payment gateway or other payment method is required.

11.1 UPI Manual Payment

- Checkout displays UPI Payment and Cash on Delivery.
- When UPI is selected, show Deepa Handmade business name, configurable UPI QR code, configurable UPI ID and order amount.
- Customer pays using GPay, PhonePe, Paytm, BHIM or another UPI application.
- Customer uploads payment screenshot and may enter UTR/transaction reference.
- Payment status becomes Verification Pending.
- Admin manually checks the payment and explicitly approves or rejects it.

11.2 Payment Verification

- Admin sees Order ID, customer, amount, payment method, transaction reference and payment screenshot.
- Approve changes Payment Status to PAID and Order Status to CONFIRMED.
- Reject requires a reason such as payment not received, wrong amount, unclear screenshot or invalid reference.
- Customer can upload a new proof after rejection.
- Every verification action must be logged with timestamp and admin identity.

11.3 Cash on Delivery

- Customer selects COD at checkout.
- No payment screenshot is required.
- Order proceeds through confirmation, production, packing, shipping and delivery.
- COD availability can be configurable by location, product or order value.

12. Order Lifecycle

UPI: ORDER_PLACED → PAYMENT_PENDING → PAYMENT_VERIFICATION → PAYMENT_CONFIRMED → ORDER_CONFIRMED → PRODUCTION → QUALITY_CHECK → PACKED → SHIPPED → OUT_FOR_DELIVERY → DELIVERED.

COD: ORDER_PLACED → COD_CONFIRMED → PRODUCTION → QUALITY_CHECK → PACKED → SHIPPED → OUT_FOR_DELIVERY → DELIVERED.

13. Cancellation, Returns & Replacement

- Cancellation rules are configurable. Example: before production allowed; after production requires admin approval; shipped orders cannot normally be cancelled.
- Return/replacement policy supports configurable return window, damaged product policy and wrong-product policy.
- Customer can submit reason, description and photos/videos.

14. WhatsApp Integration

- Product pages include Order on WhatsApp.
- Generated message includes product, SKU, size, color, quantity and price.
- Custom and bulk pages include WhatsApp contact CTAs.
- Payment/order issues can also provide a WhatsApp contact option.

15. Inventory Management

- Raw material tracking: wire, plastic wire, handle material, packaging material and labels.
- Finished product stock by variant/color/size.
- Track current stock, minimum stock, purchase cost and supplier.
- Stock reduction and restoration rules are configurable.

16. Production Management

- Production statuses: Pending, Assigned, In Production, Completed, Quality Check, Rejected, Ready to Pack.
- Production record includes order, product, quantity, assigned person, start date, expected completion, actual completion and notes.

17. Quality Control

- Check correct product, color, size, handle quality, wire finishing, damage, cleanliness and quantity.
- Mark QC Passed or QC Failed before packing.

18. Packing & Shipping

- Packing statuses: Ready to Pack, Packing, Packed.
- Record package weight, dimensions, package count and notes.
- Shipping record includes courier, tracking number, shipping date and expected delivery.

19. Customer Account

- Profile, My Orders, Pending Payments, Payment History, Saved Addresses, Custom Orders, Wishlist and Reviews.

20. Product Search, Filters & Wishlist

- Search by product name, category, SKU, color and design/material.
- Filters: category, price, color, size, availability and featured.
- Sorting: newest, price low-to-high, price high-to-low and popular.
- Wishlist allows customers to save products.

21. Reviews

- Delivered customers can submit rating, review and photos.
- Admin can approve, hide or remove inappropriate reviews.

22. Offers & Coupons

- Admin can configure product/category discounts, festival offers, first-order offers and bulk discounts.
- Future coupon fields: code, discount type/value, minimum order, maximum discount, validity and usage limit.

23. Notifications

- Notify customers when order is placed, payment proof is uploaded, payment is approved/rejected, order is confirmed, production starts, order is packed, shipped and delivered.
- Initial channels: website notification and WhatsApp/manual communication; email optional.
- Future: WhatsApp API, SMS and push notifications.

24. Admin Dashboard

- Today's orders, pending orders, payment verification queue, COD orders, production pending, ready to ship, delivered and revenue.
- Admin can search/filter orders, verify payments, update status, assign production, update shipping, print invoices and contact customers.

25. Admin UPI Settings

UPI payment information must be configurable without developer changes.

- Business Name.
- UPI ID.
- UPI QR Code upload.
- Payment instructions.
- Changes should automatically appear at checkout.

26. Invoice

- Deepa Handmade business details, invoice number, order ID, order date, customer details, products, quantity, price, discount, shipping, total, payment method and payment status.

27. Reports

- Sales: daily, weekly, monthly and yearly.

- Products: best-selling, low-selling and stock reports.
- Payments: UPI paid, UPI pending, UPI rejected and COD.
- Orders: new, production, shipped, delivered and cancelled.
- Revenue: gross sales, discounts, shipping and net sales.

28. Customer Management

- Customer name, mobile, email, orders, total purchase, last order and address.
- Customer profile shows total, completed, cancelled and pending orders and total spend.

29. Content Management

- Admin-editable Home banner, About Us, Contact details, WhatsApp number, social links, FAQ, shipping policy, return policy, privacy policy and terms.

30. SEO Requirements

- Each product supports SEO title, meta description, URL slug, keywords and OG image.
- SEO-friendly product URLs.

31. Mobile-First Requirements

- Responsive design optimized for mobile.
- Large product images and simple checkout.
- Easy WhatsApp CTA, UPI payment and screenshot upload.
- Fast loading and simple navigation.

32. Recommended Technology

- Frontend: Next.js, React, Tailwind CSS.
- Backend: Node.js with NestJS or Express.
- Database: MongoDB.
- File storage: AWS S3 or equivalent object storage.
- Authentication: JWT or secure session.
- Hosting: AWS, Cloudflare or Vercel depending on final infrastructure.

33. Suggested System Architecture

Customer → Next.js Web → Node/NestJS API → MongoDB + Object Storage + optional Redis. Admin Dashboard connects to the same backend and manages products, orders, payments, inventory, production, quality control and shipping.

34. Core Data Entities

- users, customers, admins, products, categories, product_variants, colors, sizes.
- cart, orders, order_items, payments, payment_proofs, addresses.
- custom_orders, bulk_orders, inventory, raw_materials, production_orders, quality_checks.
- shipments, reviews, wishlists, coupons, notifications, settings, audit_logs.

35. Key Business Rules

- UPI orders cannot be treated as paid until admin approval.
- COD orders do not require payment proof.
- Only authorized admin can approve/reject UPI payment proof.
- Rejection requires a reason.
- UPI QR and UPI ID must be configurable.
- Stock movement occurs at the configured confirmed stage.
- Custom products may require quotation before payment.
- Wholesale pricing can be quantity-based.
- Cancelled orders restore stock where applicable.
- Payment verification actions are audit logged.

36. Custom Product Pricing

For custom products, the admin calculates material cost + labour cost + packaging + shipping + profit, provides a final quotation, and after customer acceptance the order proceeds to payment.

37. Shipping Calculation

- Initial options: flat shipping or free shipping above a configured order value.
- Future option: pincode/courier-based shipping calculation.

38. MVP Scope

38.1 Customer MVP

- Home, products, categories, product details, search, cart, checkout, UPI, payment screenshot, COD, order tracking, custom order, bulk enquiry, WhatsApp and account.

38.2 Admin MVP

- Dashboard, products, categories, orders, UPI verification, COD management, customers, custom orders, bulk orders, inventory, shipping, UPI settings and reports.

39. Future Roadmap

- Phase 2: reseller portal, advanced inventory, staff management, production planning, WhatsApp API, SMS, loyalty, coupons and advanced reports.
- Phase 3: distributor management, multi-location inventory, supplier management, purchase orders, advanced accounting, automated shipping integration, GST accounting integration and mobile app.

40. Success Metrics

- Orders per day/month, revenue and average order value.
- Best-selling product, popular color/size and custom-order count.
- UPI orders, COD orders, pending/rejected UPI verification.
- Production time, processing time, delivery time and cancellation rate.
- New customers, repeat customers, wholesale customers and resellers.

41. Complete Customer Journey

Customer visits website → selects product → chooses size/color/quantity → adds to cart → checkout → selects UPI or COD → if UPI, pays to Deepa UPI and uploads screenshot → admin verifies → order confirmed → production → quality check → packing → shipping → delivery → review.

42. Complete Admin Journey

Admin login → dashboard → payment verification → approve/reject → order queue → production → quality check → packing → shipping → delivery → reporting.

43. Final Product Principle

Deepa Handmade is not only a product catalogue. It should support the complete business journey: Product Discovery → Customization → Order → UPI/COD → Manual Payment Verification → Production → Quality Check → Packing → Shipping → Delivery → Repeat Customer.
